The ritualist shortly returned, and one of Pas' sons also went to the table and drank a sip of tuba. If there had been more tuba the son would have emptied the cup and then refilled it. Since only a small amount of tuba was available, he took but a swallow. The ritualist refilled the cup and again walked into the corn rows to mutter his incantations. 243

During the dulot Pas' sons and their male companions snickered and quietly laughed among themselves. Pas and her female companions were quiet but appeared slightly bored. Although the writer's presence may have been a disturbing element, he knew the family well. The participants acted as they would at a social gathering; certainly they showed neither religious awe nor fear. The man performing the dulot was quite serious in mien, but gave no indication of annoyance at the attitude of the young people. 771 781 243

When the offering was finished the table and food were carried inside the house. A rosary then was held by the women for the souls of previous owners of the cornfield. When the rosary was finished a large pot of boiled corn ears and kinalopis were placed on the floor under the center joint of the roof. The pot was surrounded by four plates of boiled fresh-water shrimp. Two girls and one of sons lifted the pot three times; a little food was thrown upward and some was pushed through the floor slats, as a symbolic offering to the souls of Pas' departed parents. 243 [177]

The group performed this ceremony with much amusement. Then all the guests were served a meal, including food prepared for the dulot offering.

More visitors came later, although not as many as were expected. Pas said this was because six other dulots were being held in Lamtoc the same night! The visitors were given kinalopis to take home; the man who conducted the dulot received an additional gift of food.

The spatial distribution of the dulot in Caticugan is quite interesting. The dulot is practiced in Talo-ot, by most of the people who cultivate fields west of the main canal in Barrio Caticugan, and in lower Naga. People living east of the main canal in Barrio Caticugan and in upper Naga generally do not hold a dulot before harvesting corn. While the distribution of the dulot in the upper Siaton River valley is not known in detail, it is far more widely practiced in these barrios than in Caticugan. Lamtoc is a small sitio yet in one night six different families were holding a dulot. This attempt to delimit the dulot areas in Caticugan is only approximate. One woman living in Talo-ot cultivated as a tenant, a field between the main path and Caticugan creek; she held a dulot.

It is difficult to determine why the dulot is not held in upper Naga. Many factors are involved. First, there are only a few fields in this area. Second, more people are giving up the dulot in Caticugan than in the more remote barrios fact to be discussed later. Third,

one in the barrio owned a boat. One man had a partnership with a resident of a seaside barrio; the former made the bobo, the latter furnished the boat and they shared the catch equally. This was the only such partnership discovered in Caticugan. The barriofolk of Caticugan depend largely on products of the creek and river for their proteins. Data of diet indicate that pelagic products are not common in the daily diet. The small fish, eels, shrimp, crabs and snails obtained from the creek and river compose the bulk of aquatic foods eaten in Caticugan. The importance of this source of food for rural Filipinos has been overlooked almost entirely.[75]

As with agricultural and food-gathering activities, pre-Hispanic animism appears in aquatic techniques. The ceremonies related to the construction of boats, fish corrals and the rituals connected with the installation of these devices, reflect deep-rooted beliefs in unseen spirits who are the titular owners of sea products. While some poblacion residents who finance fish corrals are sceptical of these concepts, they usually are tolerant of their workers' attitudes. Perhaps these more sophisticated individuals, not thoroughly convinced of the falsity of these beliefs, take the attitude that "most superstitious practices do no harm and may do some good," a Cebuano saying. These attitudes and customs associated with securing

[75] The Rivera-McMillan report includes several pages of "typical menus of rural households" (Appendix C) that make no mention of fresh-water shrimp or snails. However, one picture is included (p. 162) that shows a small family eating "rice, small shrimp, and snail for supper." The lack of this information in the typical menus may be due to the barriofolk's hesitation to admit eating snails. Rivera-McMillan, op. cit., pp. 212-3.
